#### **Skin Contact:**

If skin contact occurs, remove contaminated clothing and wash skin thoroughly with water and follow by washing with soap if available. If irritation occurs seek medical advice.

## **Eye Contact:**

If in eyes, hold eyelids apart and flush the eye continuously with running water. Continue flushing until advised to stop by a Poisons Information Centre or a doctor, or for at least 15 minutes.

## Ingestion:

Rinse mouth with water. If swallowed, do NOT induce vomiting. Give a glass of water. Seek immediate medical assistance.

# **Section 5 - Fire - Fighting Measures**

## 5.1 Extinguishing Media

Alcohol resistant foam is the preferred firefighting medium but, if it is not available, fine water spray or water fog can be used.

## 5.2 Specific Hazards arising from the Substance or Mixture

Highly flammable liquid. May form flammable vapour mixtures with air.

Avoid all ignition sources. All potential sources of ignition (open flames, pilot lights, furnaces, spark producing switches and electrical equipment etc) must be eliminated both in and near the work area.

Do NOT smoke. Flameproof equipment is necessary in all areas where this chemical is being used. Nearby equipment must be earthed. Vapour may travel a considerable distance to source of ignition and flash back.

# 5.3 Recommendations for Fire Fighting Personnel

On burning will emit toxic fumes. Keep containers cool with water spray. If safe to do so, remove containers from path of fire. Fire fighters to wear self-contained breathing apparatus and suitable protective clothing if risk of exposure to vapour or products of combustion.

# 5.4 Hazchem or Emergency action code: 2YE

## Section 6 - Accidental Release Measures

# 6.1 Personal precautions / Protective equipment / Methods and materials for Containment and cleaning up:

Slippery when spilt. Avoid accidents, clean up immediately. Wear protective equipment to prevent skin and eye contact and breathing in vapours. Work up wind or increase ventilation. Contain - prevent run off into drains and waterways. Use absorbent (soil, sand or other inert material).

# 6.2 Emergency procedures / Precautions relating to the environment

Shut off all possible sources of ignition. Clear area of all unprotected personnel. If contamination of sewers or waterways has occurred advise local emergency services.

# **Section 7 - Handling and Storage**

This material is a Scheduled Poison S5 and a Class 3 flammable liquid and must be stored, maintained and used in accordance with the relevant regulations.

#### 7.1 Precautions For Safe Handling

Keep out of reach of children. Avoid skin and eye contact and breathing in vapour.

Other Non Hazardous	not set	not set	not set	not set

Biological Limit Values: No information available on biological limit values for this product.

## 8.2 Engineering Controls

Ensure ventilation is adequate to maintain air concentrations below Workplace Exposure Standards.

Vapour heavier than air - prevent concentration in hollows or sumps.

DO NOT enter confined spaces where vapour may have collected.

Keep containers closed when not in use.

# 8.4 Personal Protective Equipment (PPE)

The selection of PPE is dependent on a detailed risk assessment. The risk assessment should consider the work situation, the physical form of the chemical, the handling methods, and environmental factors.

OVERALLS, SAFETY SHOES, CHEMICAL GOGGLES, GLOVES, RESPIRATOR.

Wear overalls, chemical goggles and impervious gloves. Use with adequate ventilation. If determined by a risk assessment an inhalation risk exists, wear an organic vapour/particulate respirator or an air supplied mask meeting the requirements of AS/NZS 1715 and AS/NZS 1716. Always wash hands before smoking, eating, drinking or using the toilet. Wash contaminated clothing and other protective equipment before storage or re-use.

# **Section 11 - Toxicological Information**

No adverse health effects expected if the product is handled in accordance with this Safety Data Sheet and the product label. Symptoms or effects that may arise if the product is mishandled and overexposure occurs are:

#### a) Ingestion:

Swallowing can result in nausea, vomiting and central nervous system depression. If the victim is showing signs of central system depression (like those of drunkeness) there is greater likelihood of the patient breathing in vomit and causing damage to the lungs. Breathing in vomit may lead to aspiration pneumonia (inflammation of the lung).

b) Eye Contact: An eye irritant.

# c) Skin Contact:

Contact with skin may result in irritation. Will have a degreasing action on the skin. Repeated or prolonged skin contact may lead to irritant contact dermatitis.

## d) Inhalation:

Material may be irritant to the mucous membranes of the respiratory tract (airways). Breathing in vapour can result in headaches, dizziness, drowsiness, and possible nausea. Breathing in high concentrations can produce central nervous system depression, which can lead to loss of co-ordination, impaired judgement and if exposure is prolonged, unconsciousness.

#### **Acute**

A study of 800 workers occupationally exposed to acetone vapours (600-2150 ppm) over an 18 year period revealed no significant adverse effects in exposed compared with unexposed workers.
